```java
import java.io.FileWriter;
import java.io.IOException;
import java.io.PrintWriter;

public class WritingExample{
    void run(String[] args) throws IOException{
        PrintWriter writer1 = new PrintWriter(new FileWriter("file1.txt"));
        PrintWriter writer2 = new PrintWriter(new FileWriter("file2.txt"));
        PrintWriter writer3 = new PrintWriter(new FileWriter("file3.txt"));
        PrintWriter writer4 = new PrintWriter(new FileWriter("file4.txt"));

        writer1.println("おはようございます!");
        writer2.println("Good Morning!");
        writer3.println("Guten Morgen!");
        writer4.println("Buon giorno!");
        writer3.println("Good Afternoon!");
        writer2.println("Buona sera!");
        writer4.println("こんばんは!");

        writer1.close();
        writer2.close();
        writer3.close();
        writer4.close();
    }

    public static void main(String[] args) throws IOException{
        WritingExample example = new WritingExample();
        example.run(args);
    }
}
```
